Languages

Hebrew, Native Speaker.

English, Near Fluent.

Arabic, Basic.

Summary

Looking for my first job as a **front-end developer**. Main stack is React. All projects are responsive. Learned independently via online courses, documentation and other resources.

Portfolio: https://portfolio-mm.netlify.com

Projects

- **Online-Store**: A store which is not only a store, it's also online! This is where you can pretend to buy stuff and then fake paying for it with stripe.

- **TMDb-Movies-Search**: Responsive app for searching movies by title, using asynchronous redux.

- **Teimanei-Kineret**: New version for an old community and memorial website. Made it responsive with improved design, using Js, bootstrap, expressJS and more.

- **Global-Trekking:** Landing page for a traveling company. My goal was to quickly build a nice responsive layout using CSS flexbox.

Education

2014: Bachelor of Middle Eastern Studies (major track) and State of Israel Studies at **Ben-Gurion University**, GPA 90.6.

Military Service

2005-2008: PC Technician, Head of **App and Hardware** team in the computers department of the 371 unit of communications in the northern command.

Skills

- HTML5
- NPM
- ExpressJS
- Sass
- Javascript
- React
- Styled Components
- CSS3
- Redux
- Bootstrap
